The maps Johnny submitted to complete Phase I bond release can be approved. He submitted them ready for final distribution so, we don't need to do a conditional approval letter - just Phase I is granted! I did not do a memo on the maps I just changed the decision document referenced above. **How are we going to handle this?** If we reprint the decision document remember that there are photo attachments that go with it, DD-BR00BA.

I have forgotten with the letters that go out the recommendation to get surface water samples prior to final bond release. I don't think this final letter is the letter to do it, but maybe Joe, as the inspector, you can keep reminding them.
