Pam- I have spoken with Johnny Pappas (he leaves for Greece tomorrow) about what John Borla told the group attending the Crandall Canyon shafts meeting, I.e., that RAG corporate had issued instructions to proceed with the reclamation of all of the Utah properties. I left him the option that if it was not the intent of Willow Creek management to not exit their current "temporary cessation" status, then they must explain the justification for not doing so. Otherwise their letter must indicate same, such that they can be returned to a monthly inspection status. Johnny indicated that he would forward the request to John Borla. The purpose of this E-mail is to document the Division's request, so you may want to send this to the special file that is set up for critical E-mails. Thanks.....
