Dana,

I believe that all 1st Qtr. 2005 water sample data for Willow Creek, Star Pont and Castle Gate are ready to go. If you find any problems let me know.

Thanks,  
Dennis

Dennis,

The files are fine. I fixed the bicarbonate and carbonate - the database was asking for the old type.

You just need to check the box by each parameter and give a reason why the sample is higher than the standard deviation. You can just say "as reported by lab" or if you know that it is due to high runoff levels, or something like that you can type that in. I did B-5 as an example.

Please let me know if this helps.

Thanks,  
Dana

Dana,

My second attempt with CT&E's second file for the Willow Creek water sample data Stations B5 and B6 seems to have the same problems as the first. I have attached the file from CT&E in hopes you can determine what is wrong. I will need to change the water temp from F to C and load the Dissolved Oxygen. Would you please take a look and let me know what you think.

Thanks,  
Dennis
