**1. Permits, Change, Transfer, Renewal, Sale**

In 2014 the permittee will be submitting an application for Phase III bond release of two sub-station and Adit #1. The total area is less than 3 acres.

**2. Signs and Markers**

The identification sign is located in front of adit #1 reclamation. The information on the sign meets the minimum requirements of the R645 Coal Rules. The permittee put a new lock on gate at Mine #3.

**3. Topsoil**

There was a rain storm yesterday and there were no signs of erosion today, All topsoil was used in reclamation. The topsoil appeared to be stable.

**4.a Hydrologic Balance: Diversions**

The diversion at adit #1 is opening and functioning as designed. The diversion had water flow last night due to rainstorm. The grasses inside the diversion were laying flat.

**4.c Hydrologic Balance: Other Sediment Control Measures**

The reclaim site is completely pocked for sediment control.

**8. Noncoal Waste**

The sites were clear of non-coal waste materials.

**10. Slides and Other Damage**

No slides or other damage was noticed during the inspection.

**12. Backfilling And Grading**

All three sites in my opinion meet AOC.
