1. Permits, Change, Transfer, Renewal, Sale

The Phase III inspection was conducted on May 29th. The two sub-stations and adit #1 were inspected for Phase III bond release. These areas are less than 3 acres. The amendment for bond release review is to be completed by July 7, 2014. This will most likely be the last inspection for Castle gate.

2. Signs and Markers

The identification sign at sowbelly was taken. The permittee has an extra sign and will be hung prior to bond release. The identification sign is located in front of adit #1 reclamation. The information on the sign meets the minimum requirements of the R645 Coal Rules.

3. Topsoil

All topsoil was used in reclamation. I did not see any topsoil erosion during the inspection. The topsoil appeared to be stable.

4.a Hydrologic Balance: Diversions

The only diversions ditch at Adit #1 was open and functioning as design.

8. Noncoal Waste

The site was clear of non-coal waste materials.

12. Backfilling And Grading

The three sites were reclaimed to AOC.
