Inspection Memo
To Coal File:

Re: Getty Minerals Company
Coal Exploration
CEP/007/005
Carbon County, Utah

On March 15, 1983, Getty Minerals Company submitted to the Division an exploration plan for Federal Coal Leases No. U-20305, U-044076, U-0142235, U-0147570 and U-073120. According to the exploration plan three data collection methods were to be used; drilling and coring, electromagnetic surveys, and high-resolution seismic. During the drilling and coring portion of the exploration program 7 holes were to be drilled. On August 25, 1983, I visited the proposed location of each drill hole site and found that no drilling activities had taken place at that time.
