Salt Lake (801) 596-7111

July 14, 1988

I, Douglas E. Johnson, do hereby certify that during the second quarter of 1988, approximately 7740 cubic yards of gob material were hauled to the Scofield Waste Rock Disposal site. As of this date, all of the material has not been spread and compacted into lifts due to the high moisture content of the gob material.

I, Douglas E. Johnson, do certify that the sedimentation pond located at the Railroad Loadout Area for the Skyline Mines has been inspected quarterly during the past year for any structural weakness, erosion, or hazardous conditions. A seep was discovered during the month of April. As of this date, repairs have been made to the pond by adding an additional 2" layer of bentonite.

The average depth of the pond, excluding sediment, is 6.6 feet. Overflow elevation is 7926 feet.
