FROM: Randy Harden, Reclamation Engineer *RH*

RE: Sediment Pond 002 Modification, Skyline Mine, Utah
Fuel Company, ACT/007/005/88-D, Folder #2, Carbon
County, Utah

Summary:

Modification ACT/007/005/88-D required that the operator submit revised drawings with certification for revisions to sediment pond 002. These drawings were submitted on December 1, 1988 in accordance with the stipulated due date on the MRP amendment.

Analysis:

Information submitted by the operator is considered to be adequate. The sediment pond decant elevation was lowered in order to accomodate culverts leading into the sediment pond from the new stoker coal bin facilities. Pond volume was adjusted accordingly to accomodate the lowering of the pond level. The requirements of this modification to the MRP have been met by the operator. These drawings have been incorporated into the plan along with those submittals for the permit renewal process.
