RE: Stipulation Review, South Fork Portal Breakout
Facilities, Utah Fuel Company, Skyline Mine,
ACT/007/004, Folder #2, Carbon County, Utah

The following comments are in regard to the October 24, 1988 response to stipulations for the South Fork Portal Breakout facilities at Utah Fuel Company:

Stipulation UMC 817.101-(1)-JRH

The operator shall be required to revise the mining and reclamation plan to incorporate those sections of the South Fork Access Road and the slash area to be utilized as a borrow area for the portal breakout into the disturbed area boundaries for the permit. The operator shall submit revised drawings incorporating these facilities into the plan and modify the mining and reclamation plan to include this area. Inclusion of these facilities shall be accomplished in conjunction with the five-year permit review and shall be submitted to the Division with information required by the November 1, 1988 deadline.

Response:

The operator has revised page 3-64 and Map No. 3.2.11-1 in response to the above stipulation.

Map No. 3.2.11-1 has not indicated that the South Fork Access Road and the slash area are within the disturbed area boundaries for the proposal. The operator is not considered to have adequately responded to the requirements of this stipulation. These areas must be incorporated into the disturbed area boundary, identified on the drawings, have suitable plans for reclamation, and be incorporated into the bonding area. These modifications need to be submitted in conjunction with the schedule assigned for permit renewal.
