TO: Sue Linner, Permit Supervisor  
FROM: Lynn Kunzler, Reclamation Biologist *ly K*  
RE: Skyline Breakout, Utah Fuel Company, Skyline Mine,  
ACT/007/008 - 88G, Folder #2, Carbon County, Utah

## Summary

The Above referenced amendment has been reviewed for the biological resources information and planning and has been found to be incomplete for approval at this time.

## Analysis

Construction has been timed to avoid conflict with special wildlife use periods and is acceptable. Plans to screen the entries to prevent wildlife access is appropriate.

The proposed amendment does not discuss temporary (interim) stabilization of the disturbed area between the construction period and final reclamation with the exception of the topsoil stockpile. Plans to vegetate or otherwise stabilize disturbed areas not actively needed for mining needs to be addressed.

Final revegetation plans do not discuss timing or mulching. It is acceptable to address these by reference to appropriate sections of the MRP.

## Recommendations

The referenced amendment could be approved when the issues discussed above have been adequately addressed.
