Dear Dr. Nielson:

Enclosed is an updated computer printout of the water quality data for Coastal States' Skyline Coal Mines project. The tabulated data and statistical summaries cover a period through the third quarter of 1989.

Recent additions to the water quality constituent lists have resulted in a need to reformat both the statistical summary and tabulated data pages. This in turn has created a volume of pages exceeding the capacity of your current binders. Consequently, a complete set of reformatted data in new binders is herewith submitted. Please remove the tabs and the map from your old binder and insert them as appropriate into the new books.

Sincerely,

Keith W. Welch
