DIVISION OF  
OIL, GAS & MINING

Dear Dr. Nielson:

Submitted herewith are two (2) copies of the revised application to renew the Skyline Mining Permit. These documents respond to the Initial Completeness Reviews by your staff and constitute a resubmittal of our August 29, 1986 application. A copy has also been forwarded directly to the Forest Service for their review.

Utah Fuel Company has prepared this submittal to provide ease of incorporation into the original documents. To ensure that the deficiencies listed in your Initial Completeness Reviews are adequately addressed, we have elected to essentially rewrite the text portion of the previous submittal and to supplement these documents with additional or revised maps and drawings. The Engineering Calculation Section has also been extensively revised.

Complete replacement sets of the test revisions have been provided to facilitate updating. Altered text pages may be identified by the revision blocks at the bottom of the page. A complete revised set of Engineering Calculations have also been provided as have copies of revised or new maps and drawings. A detailed list of the documents included in this submittal is attached along with instructions for updating the application.

We again express our willingness to work closely with members of your staff during the final review process to answer questions or to provide additional information as necessary.

Sincerely yours,

  
Vernal J. Mortensen  
Senior Vice President
