Lowell P. Braxton
Associate Director of Mining
Division of Oil, Gas & Mining
355 West North Temple
3 Triad Center, Suite 350
Salt Lake City, Utah 84180-1203

Dear Mr. Braxton:

Attached is the data that we have collected since our last report for Nitrate and Nitrite levels coming out of Mine No. 3 and the Sedimentation pond discharge.

The levels of both Nitrate and Nitrite have remained basically at normal background levels since the first of the year. The source of the increased Nitrate and Nitrite levels has been completely eliminated. We are now in the process of completely dismantling and moving our longwall equipment from Mine No. 3 to Mine No. 1. The emulsion oil that we are now using contains no Nitrates or Nitrites. There no longer exists any source for potential increases in Nitrates or Nitrites in either of our mines. We are therefore requesting that we no longer be required to continue to test for Nitrate or Nitrite levels in our discharge water.

If you need any additional information please contact us.

Sincerely,

Glen A. Zumwalt
Vice President/General Manager
