DIVISION OF  
OIL, GAS & MINING

Dear Mr. Thompson:

In accordance with the conditions of NPDES Discharge Permit UT-0023540 Part II - A-2 and Utah Mining Code Section 817.52(b)(i)(ii), Utah Fuel Company is herewith providing the required written notification of a failure to comply with the maximum effluent limitations for total dissolved solids and oil and grease at the 001 discharge point.

The problem occurred with the sample taken March 22, 1989 which had a TDS concentration of 890 mg/l and an oil and grease concentration of 11.2 mg/l. The TDS limitation for this discharge is 700 mg/l; the oil and grease limitation is 10 mg/l. Previous TDS problems have occurred with samples taken August 20, 1987, November 6, 1987, November 18, 1987, December 2, 1987, January 13, 1988, January 29, 1988, March 23, 1988, April 27, 1988, May 4, 1988, June 28, 1988, September 19, 1988, November 18, 1988, December 6, 1988, January 12, 1989, January 25, 1989, February 8, 1989, February 27, 1989 and March 22, 1989. Oil and grease problems have not occurred recently. This matter is being investigated.

Fluctuations in water quality are routinely experienced and are a normal part of the mining process. Based on this understanding, an increase in the TDS limitation has been requested to cover these excursions. Action on this request is pending EPA approval.

Sincerely,

*Keith W. Welch*
