Re: Skyline Mine TDN 90-02-107-5

Dear Dr. Nielson:

The following addresses the additional information submitted by the Division of Oil, Gas and Mining (DOGM) in response to the above-referenced Ten-Day Notice (TDN).

The information submitted by DOGM includes a memorandum to Robert Hagen, Director, Albuquerque Field Office (AFO), and a copy of the revised Skyline Mine map, 3.2.1.-1.

The memorandum indicates DOGM has required the operator to submit an amendment and revised map to handle the area in question. The memorandum also indicates that the revision to the mining and reclamation plan should be approved by July 18, 1990. In addition, the memorandum commits to provide a copy of the referenced map to AFO.

The map provided to AFO indicates that the area in question is within the disturbed area boundary and that runoff from the area has been addressed as part of Special Exempt Area 7.

Therefore, because DOGM has initiated the process to require the permit to be revised and has specified the date by which the revision will be approved, AFO finds the response to the TDN appropriate.
