Mr. Daron Haddock, Permit Supervisor  
Division of Oil, Gas & Mining  
355 West North temple  
3 Triad Center, Suite 350  
Salt Lake City, UT 84180-1203

Dear Mr. ~~Haddock~~ <sup>Daron</sup>:

Enclosed are six copies of map 3.2.1-1 (Mine Surface Facilities Plot Plan), map 3.2.1-3 (Loadout Facilities), and certified design calculation for proposed swale sw-10 at the loadout area. These maps show the following proposed facilities:

Map 3.2.1-1	Reclamation Cost
1. Truck/storage shed (30'x100') power & poke	\$12,000
2. Covered Dock	200
3. Concrete Trash Area (16' x 20')	1,500
4. 400' of cyclone fencing	500
5. Drive under	<u>860</u>
Map 3.2.1-3	
1. Concrete walls (2 ea. 6' x 3' x 8")	200
2. Concrete swale (sw-10) (10' x 20')	<u>800</u>
Total	<b>\$16,060</b>

In our reclamation bond we have included a 10% contingency in the amount of \$198,360. We feel this contingency fund is adequate to cover these additional facilities and that an adjustment in our bond is not needed at this time. In our M&RP renewal application later this year we will proposed an increase in our contingency fund to cover miscellaneous small projects in the future.

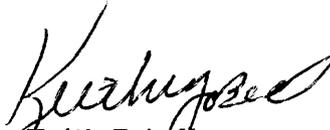

DOGM Letter  
Page two

The proposed truck/storage shed will have a roof and siding. The roof and siding will match the existing surface and office buildings (Azetic gold siding and brown on the roof). Other standard colors can be selected if deemed necessary by the U.S. Forest Service. For your convenience I have circled in red the proposed facilities on the first copy of each set of maps.

Since our construction season is rapidly coming to an end, we would appreciate an early review and approval.

If you need any additional information, please call me.

Sincerely,

A handwritten signature in cursive script, appearing to read "Keith Zobel".

Keith Zobel  
Environmental Engineer
