The submittal received on December 12, 1990, regarding the above noted permitting action was reviewed and found to be complete and adequate by Dave Darby, Geologist, of the Division's technical staff. The submittal was in response to concerns expressed regarding the effect on the natural gas pipeline recently rerouted in the area.

The Division hereby considers the above referenced amendment complete. However, this should not be considered blanket approval for mining beneath all stream buffer zones. The Division reserves the right to review any proposals to mine beneath stream buffer zones. Thank you for your cooperation in resolving this matter.

Sincerely,

Daron R. Haddock
Permit Supervisor
