I, Carl W. Winters, do hereby certify that during the fourth quarter of 1992, approximately 475 cubic yards of gob material and 500 cubic yards of soil material were hauled to the Scofield Waste Rock Disposal Site. All gob material was spread and wheel compacted into lifts not to exceed two feet in depth. The soil material was stockpiled within the site and will be used as cover material. Inspections of the site did not reveal any appearances of instability, structural weakness or other hazardous conditions.
