DIVISION OF
OIL, GAS & MINING

Dear Mr. Haddock:

RE: PERMIT CHANGE FOR RAILROAD LOADOUT EXPANSION

The following is Utah Fuel's response to the partial approval for the railroad loadout expansion.

1. Pond Construction and Certification. Attached is a new certification for the RRLO sediment pond, New map 3.2.1-4, and new engineering alterations pages 1/18, 1a/18, 2/18, 2a/18, 2b/18, 2c/18, 3/18 and 4/18.
2. Diversions and Drainages. To avoid confusion created by further clutter on Map 3.2.1-3, the drainage is shown on an 8-1/2 x 11 sheet. It should be included in the Engineering Section 10, Volume 5.
3. Foundation Material and Slope Stability. Attached is a copy of the slope stability analysis for both the expansion and the main coal storage area.
4. Map 3.2.1-3. To be completely redone in early 1994. It has already been flown, and the digitizing will be done this winter.
5. MSHA. MSHA requires a berm at the end of any pad where machinery operates. This dirt berm is shown on Map 3.2.1-3. (If coal is pushed against this berm, we will fill in ditch DD-13, a violation).
6. Habitat Enhancement. Page 3-27a has been changed to include the necessary information.
7. Backfilling and Grading. A soil sample was collected and sent to a laboratory for analysis. A copy of the analysis is included in each packet of information.

8. Topsoil Materials. Pages 4-38(c) and 4-38(d) were corrected for the submittal of the waste rock expansion permit amendment. Copies of these pages are attached.

Enclosed are three copies of the additional information required. Upon approval, the rest of the necessary copies will be submitted.

If you require any additional information, please contact Keith Zobell.

Sincerely,

For Ken M. Payne
Vice President/General Manager
