RE: Abatement of NOV N93-39-5-3 (Part 2 of 3), Coastal States Energy Company,  
Skyline Mine, ACT/007/005-93I, Folder #3, Carbon County, Utah

Dear Mr. Payne:

The Division has completed a review of your abatement plans associated with NOV N93-39-5-3 (Part 2 of 3). The initial plan and subsequent correction submittals have been determined to be complete and accurate by the Divisions Technical Staff. The plans are hereby approved for insertion to your mining and reclamation plan as amendment 93I with one condition. That being, the statement which indicates that water which does not meet discharge standards will be filtered through a straw bale must be removed from the plan. Water not meeting discharge standards cannot be discharged.

Skyline must now submit 12 copies of your complete amended plans by January 21, 1994 for distribution to other agencies, and incorporation into your MRP.

A termination notice is enclosed verifying that the NOV is now terminated.

If you have questions, please call me or Sharon Falvey.

Sincerely,

A handwritten signature in cursive script that reads "Daron R. Haddock".

Daron R. Haddock
