Re: Abatement of NOV 93-39-5-3 (1 of 3) Permit Amendment

Dear Mr. Haddock,

ACT/007/005 #2
Copy FAM

Attached are DOGM forms C1 and C2 along with the necessary document to amend Skyline's M&RP to satisfy part A of NOV 93-39-5-3 (1 of 3).

Included with the amendment submittal is the modeling program for demonstrating that siltation structures are not needed to protect the soil storage located in the South Fork of Eccles Creek. This modeling program has been acceptable in the state of Colorado as well as other states. We are therefore requesting that the areas specified in the south Fork of Eccles Creek be classified as "exempt areas". We have not included a modeling for sediment of concrete as we feel it intuitively apparent that concrete will not produce any sediment. We are also requesting that parts of the overland conveyor where the disturbance is now occupied with concrete also be classified as "exempt areas" as shown on the maps and in the write up. We have identified some bent locations where there is additional disturbance and have designated these areas as ASCA's.

Our designed treatment for the ASCA's are strawbales and or silt fences. We have included our minimum design for the installation of these structures. When approved, we have made arrangements with the Utah State Prison Flame-N-Go crew to install the structures starting in early June.

If you need any additional information, please contact Keith Zobell.

Sincerely,

Ken Payne
