Subject: Canyon Fuel, Skyline Mine Bussing Amendment

We reviewed the proposed MRP amendment proposing to discontinue bussing of employees at the Skyline Mine. In response, we would encourage Canyon Fuel to continue bussing because of the benefits associated with minimizing traffic volumes. However, we have no authority regarding use and traffic volumes on the State Highways used for access to the mine. In addition, we would be reluctant to consent to expansion of surface facilities to accommodate additional employee parking needs. If you have any questions, contact Aaron Howe or Carter Reed at the Forest Supervisor's Office.
