Re: Canyon Fuel Co., LLC
Skyline Mines
ACT/005/007

Dear Mr. Haddock,

You requested in a letter dated 3 December 1998, that we are required to inform you of the quantity of water pumped underground and the location in the mine where the water was pumped.

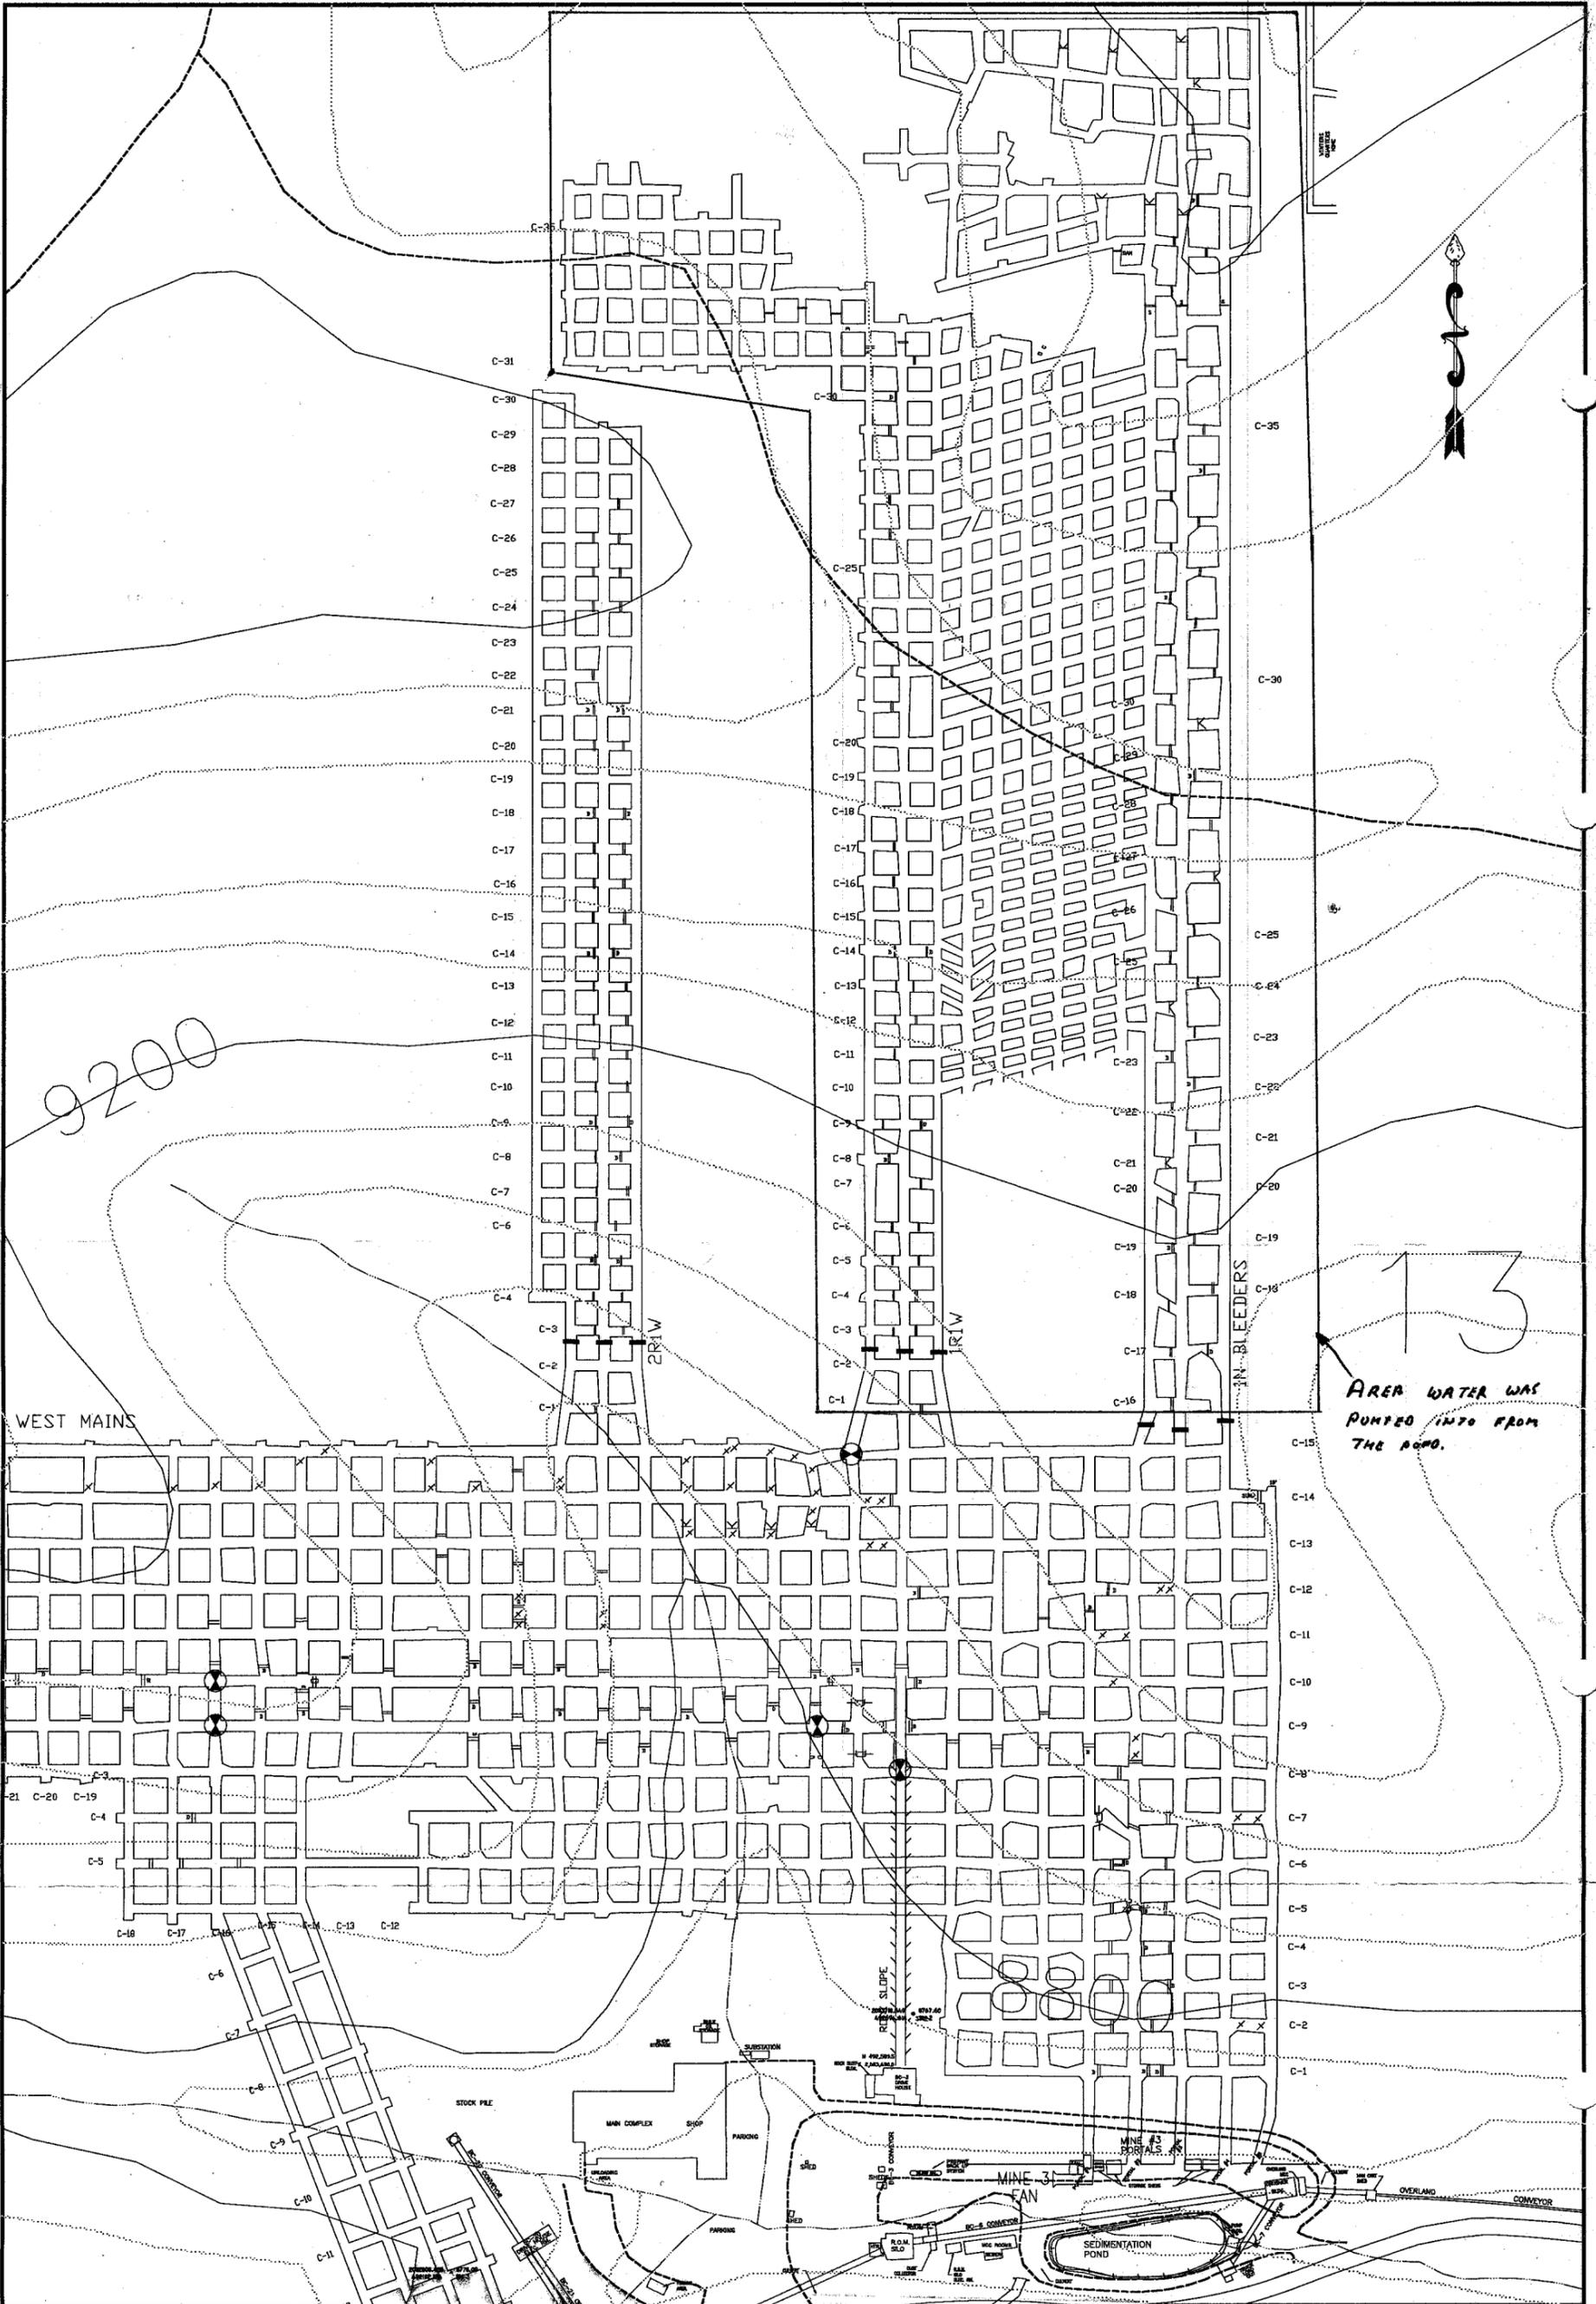

We started pumping water on the afternoon of 3 December 1998, and finished the pumping project on 16 December 1998. The quantity of water pumped underground was 9,476,000 gallons. We pumped water into the 1N Bleeders and 1R1W Sections in Skyline Mine No. 3. The location of the section is shown on the attached map.

Your prompt action with this pumping project was greatly appreciated. I apologize for taking so long in getting you this information.

Sincerely,

Gary E. Taylor
