1999 Annual Report Review

Permittee: CANYON FUEL MINE

Mine Name: SKYLINE MINE

Permit Number: ACT\007\005

Date Report Received: March 28, 2000

Assigned Reviewers: S. J. DEMCZAK(4/13/00), Paul Baker, Gregg Galecki

Instructions: The assigned staff will review their respective portions of the Annual report and provide a written determination (findings) on how the Mine has or has not met the permit requirements for reporting. If the report is deficient or remedial action is required to obtain compliance, this should be noted and the inspector notified. Once all reviewers have completed the report, they should initial it and a copy will be filed in the Mine Internal File.

Assignments:

Inspectors: Review each cover sheet, AVS Legal/Financial, Mine Sequence Maps.

Hydrologists: Review Water Monitoring Data, Precipitation and Climatological Data, Non-Coal Waste

Biologists: Review Vegetation/Revegetation Success Monitoring, Raptor Survey

Engineers: Review Subsidence Monitoring Data, Annual Impoundment Certification, Annual Overburden, Spoils, Refuse, Floor, etc.

Section to Review	Submitted	Yes	No	Findings
Cover Sheet		X	___	Submitted
AVS; Legal/ Financial Update		X	___	Submitted. AVS to be checked by PG-L.
Mine Sequence Map		X	___	Not P.E. Certified R645-301-512.110
Water Monitoring Data		X	___	Monitoring intervals are Apr-Jun, Aug-Sept, Oct-Nov. Monitoring data for Apr-Jun was collected in July with the exception of a few sites collected in late June. The two remaining sampling events were conducted in the middle of the frequency interval.

Precipitation & Climatological Data	___	X	Submitted from 1984-1991
Non-Coal Waste report	X	___	Certified Maps
Subsidence Monitoring Data	X	___	Report Complete
Annual Impoundment Certification	X	___	Report P.E. Certified
Annual Overburden, Spoil, Refuse, Floor, etc.	X	___	Report P.E. Certified
Vegetation Data	___	X	
Revegetation Success Monitoring	X	___	Report included on revegetation of the conveyor cut slopes. The operator needs to start concentrating revegetation efforts on the lowermost cut and also needs to find a suitable revegetation success standard for the cuts.
Raptor Survey	X	___	Raptor survey included. Only three nests are shown in the area, but since nests in the area would be tree nests, there are probably several that could not be found. It does not appear any mining has occurred near these nests, but it would be impossible to tell from the submitted 1999 production and development map (no scale, no coordinates, no section lines).
Other Information	___	___
