Re: Midterm Review Deficiencies, Canyon Fuel Company, LLC, Skyline Mine, ACT007/005-MT99,
Outstanding File

Dear Mr. Grubaugh-Littig:

The technical review of the mid-term submittal was received and a plan of action was developed to address the deficiencies. Discussions have been held with Mr. Mike Suflita of DOGM to determine the best way to address the deficiencies and progress has been made in looking for different slope configurations and plans in changing mine water discharge to prevent violations of water quality. Before submitting the next revisions, a meeting with Mr. Mike Suflita needs to be held. A telephone conversation was held yesterday with Mike to discuss the best time to meet with him because of his surgery. Based on the conversation, it was determined that during his next inspection would be the best time to discuss the issues. We agreed that an extension would be needed to be granted to allow Mike to recover from his surgery. Canyon Fuel Company, LLC is asking for a 6 week extension to allow Mike enough recovery time to return to work. The new submittal date would be 22 June 2000.

Please call me at (435) 448-2620 if you have any questions.

Sincerely,

Gary E. Taylor
Sr. Environmental Engineer
Canyon Fuel Company, LLC
