RE: Skyline Mine No. 3  
ID No. 42-01566  
**Underground Discharge of Surface Water**

Dear Mr. Davis:

The intent of this letter is to request approval to discharge surface water from two sumps into mined-out and sealed workings in Mine 3, Level 3. The water will be injected using pre-existing pipes installed through seals. There will be no mining inby and down-dip the proposed points of injection. The surface sumps, pipeline routing, and proposed injection points are shown on the attached drawing (Drawing 1).

We need to complete the project before cold weather arrives and will appreciate an expedited review and approval of this submittal.

Please call either Jim Poulson at 435-448-2621 or George Kenzy at 435-448-2645 if you have any questions regarding this submittal.

Sincerely,

A handwritten signature in black ink, appearing to read 'Dan Meadors', written over a horizontal line.

Dan Meadors,  
General Manager
