Subject: RE: Skyline Mine

Thanks for sending this request. I will make sure it gets put in the file and that we keep you posted and updated on the PHC and CHIA.

Sheila - please send to Skyline file. Thank you!

Mary Ann: As we just discussed by phone, you will be my Division of Oil Gas and Mining contact on the Skyline Mine water issue. You also explained that (1) Skyline Mine is currently undertaking a reevaluation and revision of the probable hydrologic consequences (PHC) section of its permit in light of the increased water flows in the mine, (2) that the Division will eventually update and revise its cumulative hydrologic impacts assessment (CHIA) based on the revised PHC, and (3) that your office would forward to me, as representative of CWCD, both of those analyses (PHC & CHIA) as they are completed. I appreciate your time and your commitment to keep us updated on this matter, and look forward to working with you. Mike Malmquist

Mike Malmquist:

I have been forwarded a copy of your email to Mike Sufliita on our coal staff. Mike Sufliita is in fact the hydrologist assigned to the mine to analyze the hydrology issues. However, due 1) to the sensitivity among parties which is currently being experienced, and 2) given the fact that you are an attorney, I respectfully request that you please direct your inquiries for information to either me, as the Associate Director for Mining, or Lowell Braxton, our Director, and copy our assistant A.G.s, Kurt Seel and John Maycock. Please call me if you have questions at 538-5306. Thank you, Mary Ann
