RE: BC-5 and Steel Drop Tube Installation At Skyline Mine, Carbon County, C/007/005

Dear Ms. Grubaugh-Littig:

Attached are C1 and C2 forms for an application to modify the Skyline Mine Mining and Reclamation Plan to include two new structures; BC-5 and a Steel Drop Tube . Four redline and seven clean copies of page 36(a) have been included with this letter. Bond calculations for the installation of this equipment is only a small percentage of the over bond amount. The contingency amount in the existing bond will cover this installation without having to increase the bond. The amounts used to calculate the reclamation costs were taken from the unit costs of the approved 1997 bond. A revised surface facilities map is also included. The modification to the permit is being sought to allow for installation of BC-5 (a surface conveyor) and steel tube. The steel tube will allow coal to be conveyed from the middle level to the lower level of the mine site. This equipment is needed to allow us to drive development entries from our existing works to gain access to our North Lease. We have estimated that approximately 305,000 tons of coal will come from the development entries during mining. The conveyor and steel tube are anticipated to have a one-year life.

If you have any questions regarding this submittal, please call me at (435) 636-2893.

Sincerely,

Gary E. Taylor
