Subject: Subsidence of Lawrence Reservoir Amendment

We have received an application from Canyon Fuel Company (Skyline mine) to allow longwall mining of a portion of the old proposed Lawrence Reservoir site. You should recall that this area was previously approved for first mining. The Company has informed us that they are quickly approaching the Lawrence Reservoir boundary and need to have approval by the end of next week. We anticipate having our review completed by May 2, 2003.

Since we are the lead agency for this permitting action, it is incumbent on us to coordinate our review and approval with your agency to ensure compliance with federal regulations. Please provide any comment you may have in this regard. We have attached an electronic copy of the application to this e-mail in order to expedite the process. A hard copy will be forthcoming.

Jim Smith has been assigned as the Lead on this project. If you have any question, please call him at (801) 538-5260 or me at (801) 538-5325.

Sincerely,
Daron R. Haddock
Permit Supervisor
