Re: Approval of Amendment to Subside Lawrence Reservoir, Canyon Fuel Company, LLC,
Skyline Mine, C/007/005-AM03E, Outgoing File

Dear Mr. Meadors:

The Division has completed the review of the above-referenced amendment. Consultation with other agencies was part of the review process. The amendment is hereby approved, effective May 2, 2003, with the following stipulations:

- Canyon Fuel must provide detailed stream (thalweg) profiles of the lower portion of Burnout Creek with photographic documentation (before and after subsiding the area) of stream channel changes, as well as flow monitoring. This information should tie in with the ongoing Burnout Creek study including macroinvertebrate population studies. An amendment to Canyon Fuel's MRP that addresses these stipulations, documents the current conditions and commits to mitigation for damages, must be submitted by June 30, 2003.

A stamped incorporated copy of the approved amendment is enclosed for your copy of the Mining and Reclamation Plan. A copy of the Technical Analysis is also enclosed.

The original amendment can be incorporated as it was submitted. However, there was an error in the text on page 1-35. That being the case, those federal agencies that previously received the amendment can simply add the corrected page to their application and incorporate it into their existing copy of the Mining and Reclamation Plan.
