

Pam:

Please find attached to this e-mail a copy of the mine/James Canyon wells discharge record for the month of February 2004. Please note that our discharge from the mine has dropped off for this month. This is the result of allowing 11, 12 Left A and B panels to flood while JC-3 is pumped at about 3,000 gpm. Once the area below 6 Left B floods, our discharge rate should increase by about 2,000 gpm. Stay tuned.

Chris
