Subject: Skyline 2004 1st Quarter water monitoring

Pam:

I have uploaded the Skyline Mine 1st Quarter 2004 water monitoring data to the EDI. Several sites were not accessible during the quarter. Most of these sites are historically not accessible in the quarter because of deep snow/and or ice creating hazardous sampling conditions. I have recently submitted a permit modification to remove these historically inaccessible sites from the winter quarter water monitoring schedule.

If you have any questions or problems regarding this data, please let me know and I will make sure is rectified

Chris.
