Subject: Mine Discharge - July 2004

Pam:

I have attached the June 2004 mine water discharge records for Skyline. I apologize that they are a few days late. We are having issues with the data collection system for the Eccles Creek discharge. Hope to have them fixed soon. For now, we have had to assume an average discharge rate of 950 gpm to Eccles Creek for the month of July. This volume is roughly generated from averaging the previous several months of discharge. Once we recover what data we can, I will update the file and forward it on. The records for JOCK-1 and JC-3 are accurate.

If you have any questions, please give me a call.

Thanks,
Chris
