I have no problem with the extension, as long as they have been working on it. Another 2 weeks? I'll have Angela save this e-mail to document your recommendation.

Susan,

I had an extended meeting with Chris Hansen and Eric Peterson this morning concerning their PHC amendment. During the meeting we decided to add three (3) Springs and two (2) Electric Lake tritium sites, and four additional 4 stream monitoring sites.

Chris had a two-week extension to submit the information, which expires Friday. He can make the deadline however, it would be modifications to the current 'Water Monitoring Tables' that are convoluted at best.

He is likely going to ask for another extension, but will completely overhaul the 'Water Monitoring Tables' in the process. My input, is that the extension would be well worth the time.

Let me know if you have any questions,
Gregg
