Subject: Electric Lake Water Balance Spreadsheet

Cody,

As additional followup to previous emails, I am currently revising the Division Cumulative Hydrologic Impact Assessment (CHIA) for the Upper Huntington - Mud Creek area. I am trying to evaluate information as current as possible including both information from Canyon Fuel Company and Pacificorp.

You mentioned that you made some modifications to the "Electric Lake Water Balance" spreadsheet (rev.09/10/2004) that would help in my analysis. For me to make a thorough evaluation of your information, the spreadsheet is critical. I will continue my update of the CHIA without your information if I don't receive it by November 1, 2004.

Your updated information is critical at this time, with the flooding of the mine.

Thanks,
Gregg Galecki
