Subject: Electric Lake Balance Spreadsheet

Cody,

To keep you posted, David Hansen and I discussed that Carly's "missing water" calculations - that were included in previous spreadsheets - was missing from the "Electric Lake Water Balance" spreadsheet submitted 29Oct04. Since the information gives a perspective of the performance of the reservoir prior to the Mine encountering water, and it is the information I used for the Water Users in September, I requested that it be included in the spreadsheet.

David indicated he was going to re-incorporate the information into the spreadsheet. Hopefully, that does not require a lot of additional work - I hope to include that information into the CHIA.

Gregg
