1. Permits, Change, Transfer, Renewal, Sale

The following permit conditions have been met or are being met:

- 1) Water Monitoring data is being submitted in an electronic format to the Division.
- 2) Canyon Fuel Co. must submit all existing studies and data for the update of the PHC as a result of the mine inflows.
- 3) Canyon Fuel Co. must submit cumulative monthly flow data for discharges into Electric Lake and Eccles Creek.

2. Signs and Markers

The Mine ID signs are at the point of public access to the permit area and contain the required information. All other signs and markers are in accordance with the coal rules.

3. Topsoil

The two topsoil piles referenced in the previous inspection have been removed from the top of the refuse pile and placed on the face of the refuse pile. Evidence that the piles were signed properly prior to this action was evident as the signs are still setting on the refuse pile.

4.d Hydrologic Balance: Water Monitoring

Third quarter 2006 water monitoring is in the EDI website and is uploaded. Fourth quarter 2006 information has been received and will be entered into the EDI website. Water monitoring is current.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile appears stable with no visible hazards.

Plans are to have Headwaters mine the refuse pile and leave large rock and tramp iron behind. Headwaters is to take the remaining refuse material from the Skyline permitted site to Headwaters Facility. At this point, the material will be processed at the Headwaters Facility and then Headwaters will market the material. Currently, Headwaters is not permitted under DOGM or OSM.
