Subject: 2nd Qtr Water Monitoring

Jim,

As we discussed yesterday, Section 2.3.7 of the Skyline M&RP provides a provision allowing an extension of Water Monitoring to July 15 due to snowmelt conditions that prohibit monitoring completion by July 1. The USFS has not opened the Granger Ridge Road as of 6/19/08 which has prohibits access to fifteen (15) of our sites. In addition, surface flow associated with the snowmelt is severely impeding the collection of representative samples from the Springs. Surface runoff in the vicinity of the springs is inundating the springs sufficiently that the Spring flows cannot be isolated. There are a total of (26) Springs that need to be collected.

As discussed, Skyline personnel intend to delay monitoring of the Springs until they can be reasonably segregated from surface runoff - which should be no later than July 15.

Please contact me if there are any questions or comments,

Gregg A. Galecki
Environmental Engineer
Skyline Mines,
Canyon Fuel Company, LLC
