Re: Waste Rock Road Snow Removal Plan, Canyon Fuel Company, LLC, Skyline Mine C/007/005

Dear Mr. Smith:

Skyline Mine anticipates continuing operations at the Waste Rock site throughout the winter months. Snow will need to be cleared from the access road and temporarily stored in the area. The existing Waste Rock Road Snow Removal Plan currently in the approved M&RP was reviewed and noted that the map mentioned in the plan was missing. Both Mr. Keith Zobell and Mr. Stan Christensen – authors of the original plan – were contacted to clarify the locations for snow storage. The plan calls for snow storage to be located at three (3) locations; SW-19, SW-13, and SW-14. After viewing the areas it was determined that SW-13 would not provide sufficient storage so the following change was made. The three (3) locations where snow will be stored are SW-14, SW-19 and in the northeast corner of the Waste Rock Pile area; immediately adjacent to the Topsoil Storage Area. The three (3) locations are illustrated on the replacement map to be added to the existing Waste Rock Road Snow Removal Plan. As noted in the currently approved plan, runoff from the snow storage areas will be treated by the sediment pond or other siltation structures.

Attached to this cover letter are completed C1 and C2 forms Page 3-56(b) which is apparently missing out of the Salt Lake M&RP, and Plate 3-56(c), which should be inserted in the M&RP in section 3.2 with the Snow Removal Plan.

If you have any questions, please call me at (435) 448-2636

Sincerely,

Gregg A. Galecki

Permit Number: C/007/005

Title: Waste Rock Road Snow Removal Plan

Description, Include reason for application and timing required to implement:

Adding map and new location for snow storage November 2008.

Instructions: If you answer yes to any of the first eight (gray) questions, this application may require Public Notice publication.

- Yes No 1. Change in the size of the Permit Area? Acres: _____ Disturbed Area: _____ increase decrease.
- Yes No 2. Is the application submitted as a result of a Division Order? DO# _____
- Yes No 3. Does the application include operations outside a previously identified Cumulative Hydrologic Impact Area?
- Yes No 4. Does the application include operations in hydrologic basins other than as currently approved?
- Yes No 5. Does the application result from cancellation, reduction or increase of insurance or reclamation bond?
- Yes No 6. Does the application require or include public notice publication?
- Yes No 7. Does the application require or include ownership, control, right-of-entry, or compliance information?
- Yes No 8. Is proposed activity within 100 feet of a public road or cemetery or 300 feet of an occupied dwelling?
- Yes No 9. Is the application submitted as a result of a Violation? NOV # _____
- Yes No 10. Is the application submitted as a result of other laws or regulations or policies?
Explain: _____
- Yes No 11. Does the application affect the surface landowner or change the post mining land use?
- Yes No 12. Does the application require or include underground design or mine sequence and timing? (Modification of R2P2)
- Yes No 13. Does the application require or include collection and reporting of any baseline information?
- Yes No 14. Could the application have any effect on wildlife or vegetation outside the current disturbed area?
- Yes No 15. Does the application require or include soil removal, storage or placement?
- Yes No 16. Does the application require or include vegetation monitoring, removal or revegetation activities?
- Yes No 17. Does the application require or include construction, modification, or removal of surface facilities?
- Yes No 18. Does the application require or include water monitoring, sediment or drainage control measures?
- Yes No 19. Does the application require or include certified designs, maps or calculation?
- Yes No 20. Does the application require or include subsidence control or monitoring?
- Yes No 21. Have reclamation costs for bonding been provided?
- Yes No 22. Does the application involve a perennial stream, a stream buffer zone or discharges to a stream?
- Yes No 23. Does the application affect permits issued by other agencies or permits issued to other entities?

Please attach four (4) review copies of the application. If the mine is on or adjacent to Forest Service land please submit five (5) copies, thank you. (These numbers include a copy for the Price Field Office)

I hereby certify that I am a responsible official of the applicant and that the information contained in this application is true and correct to the best of my information and belief in all respects with the laws of Utah in reference to commitments, undertakings, and obligations, herein.

Waste Rock Road Snow Removal Plan

If waste rock material needs to be hauled to the disposal site during the winter months, the following snow removal plan is to be followed:

- a. At the beginning of each winter season strawbales and or silt fences will be installed at the outfall area of swales - SW-19, SW-13 and SW-14. These strawbales and or silt fences are to treat additional runoff as a result of snow melt.
- b. When the road is being used on a regular basis the snow will be plowed off with the snow plow. Care is to be used to keep the snow plow blade up sufficiently to removing the road surface material and contaminating the fresh snowfall.
- c. If heavy snow accumulation occurs and the snow needs to be stacked it will be stacked in place at one of three predetermined locations. Three locations are shown on the attached map. Strawbales and or silt fences will be placed on the down hill side of the snow pile so as to treat the water as the snow melts.
