Subject: Water Database

Q

The water monitoring samples have been uploaded into the pipeline and are ready to be uploaded to the database. There are seven (7) samples that cannot be uploaded because they are Tritium samples and the analysis reports have not been received, the following are tritium samples (EL-1, EL-2, JC-1 Age Dating, 2-413, 8-253, S15-3). The sample JC-1 is calling for Total Iron but that is not a required parameter.

If you have any questions let me know,

Regards,

Austin R. Belcher
