Subject: Skyline IBC Task 2918 Internal File
Place: OGMCOAL

Hi Dana,

My recommendation from the last review of the IBC (Task 2874) is still applicable to this Task 2918 review, as follows:

Although there will be no change to the coal handling or production tonnage with this IBC, the most recent information on file is the outdated 1992 Air Quality Approval Order DAQE0773-92 (MRP, Sec. 4.22). The Permittee has subsequently filed two updates to the AO (1995 and 2003), and is in compliance with the Division of Air Quality. In accordance with R645-301-121.100, that subsequent correspondence with the Division of Air Quality should be added to Section 4.22 of the MRP, but may be a condition of approval.

I will place my memo from Task 2874 into the WG2918 folder. I would like to have an opportunity to update the Master TA.

Thanks,
Priscilla.

All:

It looks like Dave and Joe were the only ones with deficiencies on the last round, could you please let me know ASAP if there are further deficiencies, or if we will be able to approve? Thanks.

Will anyone need to update the Master TA if this is the final round?

Thanks,
Dana
