RE: 15-Day initial completeness review –Reduction in Subsidence Monitoring, Canyon Fuel Company, LLC, Skyline Mine, C/007/0005, Task # 2942

A brief review of the information submitted for the Reduction of Subsidence Monitoring indicates that the Permittee has supplied enough information to complete a technical review.

The Permittee included suggested text changes for the MRP explaining the reduction in monitoring, and an updated table of contents. The Division also recently received (March 6) a letter from Mr. Dale Harber of the United States Forest Service, indicating that the Forest Service is in agreement with the reduction in monitoring.
