Jim,  
Piezometers WQC-2 through WQC-4 are too far west to be on the map (sorry). I am not planning on putting these in as water monitoring sites since they are only for baseline information and the remainder of the piezometers will be eliminated with the pad construction.

Well 8-5-1 and Stream CS-24 need to be added to the Database so we can add the baseline information.

Garth,  
I guess you can address this.

Greetings,

I may be missing something; I can find locations for piezometers WGC-1, -5, -6, -7, and -8 on the Clement Drilling and Geophysical map, but not locations for the other three. Also, there are no baseline data for 8-5-1, the piezometers, or CS-24 in the database; apparently these need to be added to the database.

JIM
