Subject: Re: IR review Skyline, Rock Dust Transfer Lines, Task ID #3342

Suzanne,
I have completed the IR review of this application. It is a simple modification of the narrative and plate, to indicate that two holes will be drilled on the facilities pad to provide gravity feed of rock dust into the mine. The narrative change can be approved with this email. The accompanying bonding information should be reviewed by an engineer. Although the Permittee has provided clean copies of the information, he requested that if there are no deficiencies, we issue conditional approval, since there is a slight change in the Map Revision number list that he would like to make. I told him we would issue a conditional approval so that he could make that correction. (good customer service)

Priscilla.
p.s. I stayed late to get this done before I take a Monday holiday and because I will be flexing hours on Tuesday. (also good customer service).

Hello Priscilla,

We received the above-mentioned application on 6/25. The IR is due on 7/10.

Please email me, cc to Jim and Daron , when the IR is complete. At that time, I will send an email notification to the operator and jim will assign a team to review.

Also, the operator indicated that a copy of the application had been delivered to PFO.

Thanks!
Suzanne
