

# TECHNICAL MEMORANDUM

## Utah Coal Regulatory Program

---

December 9, 2010

TO: Internal File

THRU: Priscilla Burton, Team Lead *PWB km sas*

FROM: James D. Smith, Environmental Scientist III *JDS 9 Dec 2010*

RE: Table Correction, Canyon Fuel Company, Skyline Mine, Permit #C/007/0005, Task ID # 3699

### **SUMMARY:**

The Division approved the Winter Quarters Ventilation Fan amendment to the Skyline Mine MRP (Task ID # 3549) on 29 July 2010. That amendment included changes to Table 2.3.7-1. However, in that revised Table 2.3.7-1, stream monitoring site F-10 was erroneously changed from a schedule for "Quarterly Field Parameters only" to "Seasonal Monthly Flow". The current amendment simply restores site F-10 to the monitoring schedule it had prior to the error, i.e., "Quarterly Field Parameters only". Because this amendment simply corrects a clerical or typographic error, no further Technical Analysis is being provided.

### **RECOMMENDATIONS:**

"Clean" copies were submitted along with the redline copies, so the recommendation is for final approval of this amendment.
