RE: Updated Plate to add Temp. Powder Magazines, Canyon Fuel Company, LLC, Skyline Mine, C/007/0005, Task #3933.

### SUMMARY:

Plate 2.3.6-1, Winter Quarters Ventilation Shaft Pad Proposed Facilities Plan, was submitted to the Division and assigned Task #3933. The Map shows the addition of the temporary location of powder and cap magazines that are to be used in the slope construction. The duration of time that these structures will be in place ranges from 6- 18 months.

The magazines are within the permit area and are located adjacent to existing road ways for easy access the drainage areas are accounted for and no additional bond is necessary since the structures are temporary and are portable.

I recommend that Task #3933 be approved.
