2. Signs and Markers

Observed the mine identification signs at the Main Mine Facility and at the Coal Load Out Facility during the inspection. Both signs are located at entrance points into the mine permit area from a public access. Both of these signs contained all of the information that is required by regulation.

4.a Hydrologic Balance: Diversions

All diversions are blanketed by a heavy snow covering. No snow has been pushed into the diversions so they should function properly when snow melting takes place.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment ponds at the Main Mine Facility and the Coal Load Out Facility are iced over and then snow covered. Both ponds appeared stable and are functioning as designed.

5. Explosives

Explosive and Cap magazines located at the Main Mine Facility are signed properly. The enclosures are grounded as required by regulation
