2. Signs and Markers

Mine identification signs are posted at the various access points into the permit area at each location of facilities. The signs contain the information that is required by regulation.

The topsoil sign on the topsoil pile directly behind the main office has been replaced. The sign is large enough that it can be read at a great distance. This is a followup item from the previous inspection.

8. Noncoal Waste

A few items of noncoal waste items were observed. It appears that the items were probably part of snow piles that have recently melted. The items were documented by mine personnel to be picked up and placed in the appropriate storage facility.
