Ingrid,

As a follow up to our conversation this afternoon, the proposed southwestern vent shaft located in Swens Canyon will not be included in the raptor survey this year for a couple of reasons. First, we already have two (2) years of baseline data on the site, and if we do use the site construction will not start for a few years. We understand that if we do intend to construct a shaft on the site, an additional survey will need to be conducted prior to construction.

My understanding is that Skyline will be compliant with the wildlife protocol as long as we have two (2) years of baseline data, followed by an additional survey prior to construction. As an example, if we don't construct until 2015 or 2016 we will still be compliant as long as the pre-construction survey is conducted.

I'll assume this is correct unless you respond to the contrary.

Thanks,

Gregg A. Galecki
