All,

During June and July we were unable to regain communication through our RSLINX system that tracks our mine discharge. We were able to gather the July data by hand but not the June data. Today we were able to restore communication through the RSLINX system that should now be gathering the necessary information.

Per Permit Condition #2, attached is the cumulative monthly flow data for discharges into both Electric Lake and Eccles Creek – updated through July 2013. The JC-1 data logger has not been functioning since October 4, 2012. Skyline employees are working to repair/restore the data communication system. The James Canyon pump data will be included in the Mine-Well-Discharge spreadsheet as soon as it is available.

Let me know if you have any questions.

Thanks,

Austin R. Belcher

Environmental Engineer II

Canyon Fuel Company, LLC

Skyline Mine
